

OPEN/CLOSED RTM

Paragon D&E is a certified small business providing full-service tooling and machining with design and build capabilities. Paragon was established in 1942 and is located in Grand Rapids, MI.

Some of the finest equipment in North America is housed in this 170,000 sq. ft. state-of-the-art facility. The Paragon team consists of more than 200 employees working a 24/7 schedule and using the latest 5-axis equipment and CAD systems.

Paragon designs and manufactures prototype to production tooling in aluminum, steel, invar and composites for simple to complex aerospace parts. Paragon also machines and CMM inspects composite and metal parts including titanium and inconel. With 70+ ton crane capacity and machines from 1 ft. to 75 ft. in length, Paragon is equipped to handle large and small projects.

At Paragon, customer satisfaction is achieved through experienced engineers, machinists and technicians as well as quality focused internal systems. Our quality is maintained through material and special process certification, incoming inspections, continuous monitoring and final inspection prior to release for shipping.

CLOSED RTM

Tool built for GE engine housing on the Boeing 737

OPEN RTM

Layup Tools

- Tooling for A320 jet engines, sound deadening panels
- Customers' high quality standards continuously achieved
- Ability to provide lower-cost tooling and faster delivery

SOME INDUSTRIES WE SERVE

Aerospace

Heavy Truck

Automotive

Military Defense

WHAT HAVE WE ACCOMPLISHED?

We built a tool for GE housing on the Boeing 737 as well as tooling for A320 jet engines, and a sound-deadening panel.

WHAT MAKES US DIFFERENT?

- Problem Solving Innovation
- Solid Molding and Design
- Prototyping Capabilities
- Able to achieve customers' high-quality standards continuously
- Able to prove lower-cost tooling and faster delivery
- Companywide average of ____ years of service and expertise
